

1. Basic running mode. Access the FORTH prompt on BlackIce from your favorite term program on RS232/2. Can use TI FORTH for low level access, or even TI BASIC.

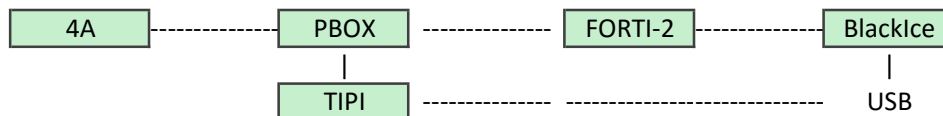

2. Use your desktop to enter FORTH code, or run the IceStorm toolchain, compile Verilog and reprogram the BlackIce FPGA.

3. Run the IceStorm toolchain on the TIPI to compile Verilog and reprogram the BlackIce FPGA.

4. Move into the PBOX

5. BlackIce internals
